European Network on New Sensing Technologies for Air Pollution Control and Environmental Sustainability - EuNetAir

COST Action TD1105

WGs and MC Meeting at ISTANBUL, 3-5 December 2014

Action Start date: 01/07/2012 - Action End date: 30/06/2016 Year 3: 1 July 2014 - 30 June 2015 (Ongoing Action)

Smart sensors for urban air monitoring in cities: research and innovation needs

Rod Jones SIG 2 Chair **Department of Chemistry**

SIG2 talks

Nuria Castell (NILU)

Outdoor air quality, assimilation of different techniques (remote/models), tests of sensor quality, promising results using e..g. latest EC sensors...

Joao Ginja (IDAD)

Indoor air quality, network deployment strategies, outdoor comparison in Aviero – interesting variations in meteorology – good test of sensors....

Scientific context and objectives in the Action

Intrinsic Sensor Capability

- Gas phase
 - Species (do we have the relevant health inputs?)
 - Sensitivity? Stability? Selectivity? (Nuria)
- Particulates
 - Chemical speciation (do we have the relevant health inputs?)
 - Bio-activity?

Certification/equivalence?

CUSE EUROPEAN COOPERATION IN SCIENCE AND TECHNOLOGY

Scientific context and objectives in the Action

Sensor Networks

- Deployment
 - Intra/inter network analysis tools?
 - Non-invasive network calibration?
 - Information content....
- Design
 - Network optimisation (indoor/outdoor)
 - Network density? Node location? (Joao)

CURPEAN COOPERATION IN SCIENCE AND TECHNOLOGY

Scientific context and objectives in the Action

'Smart'

- Smart sensors vs smart cities?
 - Identification vs response??
- Models
 - Data assimilation/display
 - Dissemination
- Citizens (as sensors?)
 - Engaging the citizen: one/two way involvement?

į

Suggested R&I Needs for future research to Action WGs/SIGs General Assembly

Detailed queries covered above.

(One approach)

- Investigation of fundamental new sensor technologies proteins? graphenes?
- Assimilation of measurement (ground/satellite)/models? (Nuria)

Requests for additions/modifications to rlj1001@cam.ac.uk

EUROPEAN COOPERATION IN SCIENCE AND TECHNOLOGY

6

Suggested R&I Needs for future research to Action WGs/SIGs General Assembly

Existing sensors on a firmer footing.....

Research Strategy?

- Health studies (find out what you need to monitor, discard the rest)
 are exclusively smart/low cost sensors needed? Preexisting data? Is this our remit?
- Devise smart sensors (to complement existing + models) to ensure compliance/societal response
